JOURNAL OF COMPUTERS

ISSN 1796-203X

Journal of Computers (JCP) is a scholarly peer-reviewed open-access international scientific journal launched in 2006, published for researchers, developers, technical managers, and educators in the computer field. It provide a high profile, leading edge forum for academic researchers, industrial professionals, engineers, consultants, managers, educators and policy makers working in the field to contribute and disseminate innovative new work on all the areas of computers. These areas include, but are not limited to, the following:

- Computer Organizations and Architectures
- Operating Systems, Software Systems, and Communication Protocols
- Real-time Systems, Embedded Systems, and Distributed Systems
- Digital Devices, Computer Components, and Interconnection Networks
- Specification, Design, Prototyping, and Testing Methods and Tools
- Artificial Intelligence, Algorithms, Computational Science
- Performance, Fault Tolerance, Reliability, Security, and Testability
- Case Studies and Experimental and Theoretical Evaluations
- New and Important Applications and Trends

JCP invite original, previously unpublished, research papers, review, survey and tutorial papers, application papers, plus case studies, short research notes and letters, on both applied and theoretical aspects.

AUTHOR GUIDELINES available on the web site at: <http://www.academpublisher.com/forauthors.html>

Special Issues are an important component of JCP. JCP encourage recognized experts to create special issues that feature specifically aimed and targeted topics of high current interest falling within the scope of the Journal.

JCP also invites organizers of high-quality conferences/workshops in the field to guest-edit Special Issue to guarantee fast publication of extended versions of the high-quality conference/workshop papers in the Journal.
